# 1. EXECUTIVE SUMMARY

---

**WHEREAS**, the Board of Directors (the “Board”) for the Joshua Basin Water District (the “District”), County of San Bernardino, State of California, directed NBS Government Finance Group, DBA NBS to prepare and file a report presenting the specifications describing the general nature and location of the facilities and an estimate of the costs of the maintenance and operations for the facilities for the Water Availability Standby Charge (the “Standby Charge”) for Fiscal Year 2024/2025. The report includes an assessment of the estimated costs of the maintenance and operations of the facilities, the apportionment methodology and the net amount upon all assessable parcels within the District;

**WHEREAS**, on July 17, 1996, the District established and levied a Standby Charge with Resolution No. 96-564 under the authority of the Uniform Standby Charge Procedures Act (Section 54984 et. seq. of the California Government Code, hereinafter the “Act”);

**THEREFORE**, the Standby Charge is estimated to generate revenues of \$1,181,275 for Fiscal Year 2024/2025 and these revenues are dedicated to cover the cost of operations and maintenance together with incidental expenses outlined below:

| SUMMARY OF CHARGES  |                    |
|---|--------------------|
| DESCRIPTION   | AMOUNT             |
| Power Expense for System Operation                          | \$600,000          |
| Water Purchase for Recharge                                 | 776,525            |
| Preventative Maintenance Programs: Reservoirs               | 60,000             |
| Pumping Plant Repair & Maintenance                          | 50,000             |
| Production Department Employee Salaries                     | 440,032            |
| Capital Improvement Replacement Program (CIRP) Debt Service | 267,891            |
| <b>Total</b>  | <b>\$2,194,448</b> |

In accordance with the requirements of the Act, the total Standby Charge costs are apportioned upon the lots, pieces, or parcels, or portions of lots or subdivisions of land that uniquely and especially benefit from the operation and maintenance activities. This apportionment process is more fully described in Section 3, Method of Apportionment.

## 2. OVERVIEW

---

### 2.1 Introduction

The Joshua Basin Water District owns and operates significant water-related infrastructure facilities. The purpose of the existence and construction of these facilities and, therefore, the responsibility of the District, is to provide potable water to property owners, residents, and businesses within the District.

The District obtains its supply of water from underlying ground waters. A study completed by the United States Geological Survey (USGS) determined that the amount of water extracted by the District exceeds the inflow or supply to the District's groundwater basins. In anticipation of the need for additional or supplemental water, the District's voters, in 1960, approved inclusion in the formation of the Mojave Water Agency which would have access to water provided by the State Water Project (SWP). As additional insurance, in 1991, voters of the District together with those of other nearby water districts, approved a bond issue to finance the construction of the 72-mile Morongo Basin Pipeline which conveys SWP water to the Morongo Basin area. The pipeline has been constructed and is maintained by the Mojave Water Agency. As one of the beneficiaries and future users, the District signed a contract and was responsible for a portion of the pipeline construction and maintenance costs. This contract obligation was ultimately paid off in Fiscal Year 2021/2022.

To allow delivery and use of water from the SWP and the Morongo Basin Pipeline, the District completed design, property acquisition, and construction of a delivery pipeline and recharge basins in 2014. Funding of the \$9.4 million project was provided substantially by state and federal grants, the Mojave Water Agency, and excess funds in the Morongo Basin Pipeline Reserve Fund. The District funded \$1.3 million or 14%.

The District has budgeted 1,300 acre-feet of SWP water recharge in Fiscal Year 2024/2025.

Following a review of the Report, the Board may continue the Standby Charge, per California Government Code Section 54984.7, may confirm the Report as submitted, and may order the levy and collection of the charges for Fiscal Year 2024/2025. If the Standby Charge is continued, the information is submitted to the San Bernardino County Auditor-Controller and included on the property tax roll for Fiscal Year 2024/2025.

### 2.2 Effect of Proposition 218

On November 5, 1996, California voters approved Proposition 218 with a final vote of 56.5% to 43.5%. The provisions of the Proposition, now articles XIII C and XIII D of the California Constitution, added substantive and procedural requirements for standby charges.

Proposition 218 provides that property owned by local, state, and federal agencies may not be exempted from a benefit assessment, such as the District's Standby Charge, unless the Agency can demonstrate that it receives no special benefit from the services or facilities for which that charge is levied. (California Constitution Article XIII D, § 4(a).)

The Standby Charge has been in effect at the current rate since 1996, before the enactment of Proposition 218 and is grandfathered under Proposition 218 unless and until it is increased. (California Constitution Article XIID, §5.) Legislation interpreting Proposition 218 clarifies that, as an exempt charge, the procedure

is also exempt from the requirement that government-owned parcels be assessed. (Government Code §53753.5.) Unless and until the Standby Charge is increased, it may be re-authorized from year-to-year pursuant to the Uniform Standby Charge Procedures Act (Government Code §54984 et seq.), exempt from the Proposition 218 procedures.

Publicly owned property including lands owned by the federal government and the local school district have been exempted from the Standby Charge. When the District sent an assessment notice to the U.S. Bureau of Land Management ("BLM"), which owns extensive property within the District, the BLM responded by claiming an exemption under the California Statehood Act and declined to pay. The local school district was not assessed based upon the California Supreme Court decision in *San Marcos Water District v. San Marcos Unified School District*. After 1996, as local, state and federal government agencies have acquired lands which were previously privately-owned, the District has initiated Standby Charges on those parcels in compliance with Proposition 218.

### **2.3 Use of Funds**

Availability of supplemental water benefits all of the land within the District. Therefore, a Standby Charge is collected from all of the ± 12,000 parcels within the District, except those exempt. The primary use of the revenues, since enactment in 1996, has been to pay the debt obligation and operation and maintenance costs for the Morongo Basin Pipeline as required by the District's agreement with the Mojave Water Agency. Although the final annual debt service payment was incurred and paid in Fiscal Year 2021/2022, costs associated with the purchase of supplemental recharge water, obtained through the Morongo Basin Pipeline, will substantially exceed the original \$220,000 annual debt service payment moving forward. Standby Charge revenues over that amount will be used exclusively for capital costs and operation and maintenance of the District's water facilities benefiting the properties from which the Standby Charge is collected.

To the extent that water availability revenues exceed expenses indicated above, they will be used for other lawful purposes of the District that qualify for grandfathering under article XIII D, section 5.

Standby Charge revenues are dedicated to the lawful purposes of (a) meeting the District's expenses of maintaining and operating permanent public improvements constituting the water system, (b) purchasing or leasing supplies, equipment, or material necessary for the operation of the District's water system, (c) meeting debt repayment obligations and financial reserve requirements, and (d) obtaining funds for capital projects necessary to maintain service within existing service areas.

## 3. METHOD OF APPORTIONMENT

---

### 3.1 General and Special Benefit

All properties within the District receive a general benefit by virtue of the existence of the District in its sole power to purchase, extract and sell water within its boundaries. Properties within the District also receive a special benefit due to the availability of the supplemental SWP water source.

The benefit is related to the size and development potential of each parcel and proximity to an existing usable pipeline. Derivation of an availability amount, therefore, is based on San Bernardino County (the "County") land use zoning, parcel size, and District-designated zone - the location related to a pipeline from which service can be provided. Larger parcels within the same District zone receive a greater benefit and, therefore, will be assessed a larger amount than smaller parcels. Additionally, parcels closer, but not connected to usable pipelines, will be assessed more than those further away as there is a greater benefit due to the availability of those existing pipelines, and therefore, accessibility to water. Parcels currently connected will be assessed less than others as they are already paying a basic fee in their user charge, a portion of which is used for system maintenance. It has been determined that every parcel proposed to be assessed a Standby Charge in the District for Fiscal Year 2024/2025 receives a special benefit.

The adoption and approval of the Standby Charge pre-dates the passage of Proposition 218 by the State's voters and follows the methodology and rates existing before the adoption of Proposition 218.

### 3.2 Definitions

**County Zone:** County Land Use Zoning District designation assigned by the County Land Use Zoning Services Department.

**Parcel:** any legal part or portion of land.

**Parcel Size:** acreage of land.

**District Zone One Parcel:** any size parcel served by one or more meters as of April 1 of the calendar year in which the Standby Charges are being calculated.

**District Zone Two Parcel:** any size parcel within 0.5 miles of a water main and in the same pressure zone as the main as of April 1 of the calendar year in which the Standby Charges are being calculated.

**District Zone Three Parcel:** any size parcel within 1.0 miles of a water main and within the same pressure zone of the main as of April 1 of the calendar year in which the Standby Charges are being calculated.

**District Zone Four Parcel:** all remaining parcels not designated in another District Zone as of April 1 of the calendar year in which the Standby Charges are being calculated.

**Miles:** miles are determined using the most accurate measuring tools available to the District at the time in which the Standby Charges are being calculated. For Fiscal Year 2024/2025, the District measured miles using Geographic Information Systems based on the parcels closest vertex and a state plane projection.

### **3.3 Apportionment Formula**

The Standby Charges are determined by:

- Parcel Size
- County Zone
- District Zone

The table found in Section 4, Standby Charge Rates, indicates the basis for the assessment amount per parcel and per acre for lands within the District related to the County Zone designation and District Zone location.

Levy amounts on properties with undivided interest parcels will be calculated by first determining a total applicable levy amount, based upon the total acreage of the physical property that they occupy. The calculated total levy amount will then be spread proportionately to each undivided interest parcel, based upon each parcel's County-assigned portion of the total interest for a given property.

### **3.4 Exemptions**

In recognition of the benefit to all properties, the District proposes to assess and collect from each benefiting property, an amount related to the benefit received. Because BLM lands and other publicly owned lands not previously assessed are, for practical purposes, not subject to assessment, the District proposes to clarify that such lands, which are not subject to the Standby Charge and are not currently connected to the water system, shall not be entitled to connect to the District's water system or to receive water service from the District, unless a fee is paid which is equivalent to the Standby Charge which would have been assessed against the property had it not been exempt and unless the owner agrees to be subject to future assessment of Standby Charges.

## 4. STANDBY CHARGE RATES

---

The following page indicates the basis for the assessment amount per parcel and per acre for lands within the District related to the County Zone designation and District Zone location.

## 5. METHOD FOR UPDATING COUNTY ZONING

---

The following pages provide a framework for the activities necessary to determine the classification of parcels into newly created County Zones.

**Joshua Basin Water District  
Water Availability Assessment (Standby Charge)  
County Land Use Zoning District Update Procedure**

The Joshua Basin Water District, Water Availability Assessment (Standby Charge) relies on three factors to determine the annual amount due per parcel. The factors include the parcel size, District zoning<sup>(1)</sup>, and County Land Use Zoning District. The rate table created when the Standby Charge was established provided accommodations for all changes in parcel size and District zoning, but not for changes in County Land Use Zoning Districts, as changes by the County were not anticipated. Notwithstanding, the County has made changes to its Land Use Zoning Districts since the establishment of the Standby Charge. This document provides a framework of the activities necessary to determine the classification of parcels into newly created County Land Use Zoning Districts.

The approval of the Standby Charge pre-dates the passage of Proposition 218. As stated in the Annual Standby Report, “The water availability charge has been in effect at the current rate since 1996, prior to the enactment of Proposition 218 and is entitled to an exemption from the procedural requirements of Proposition 218 unless and until it is increased.” Therefore, to not be considered an increase, all newly designated zone classifications caused by changes to County Land Use Zoning Districts must result in rates that are equal to or less than the amount assigned to the most similar Original County Land Use Zoning Districts<sup>(2)</sup>.

On an annual basis, the County Land Use Zoning District Update Procedures to be undertaken by the District or its agents includes:

1. Obtain a current listing of active County Land Use Zoning Districts.
2. Determine which County Land Use Zoning Districts are not shown on the most recently updated Standby Rate Table to determine the “New County Land Use Zoning Districts.”
3. Review the Original County Land Use Zoning Districts descriptions to determine the most similar Original County Land Use Zoning District.
4. Assign the rate from the most similar Original County Land Use Zoning District to the New County Land Use Zoning Districts. If there are more than one Original County Land Use Zoning Districts that closely fit the description of the New County Land Use Zoning District, assign the lowest rates associated with those Original County Land Use Zoning Districts.
5. Update Exhibit A, Schedules A and B to reflect the New County Land Use Zoning Districts and rates.

Documentation on this annual process along with all assumptions and determinations will be included in the Annual Standby Report that is approved by the Board of Directors. The District may experience a loss in revenue due to unforeseen County land use zone changes, but in no event can the rates for the new classifications exceed the previously approved rates without a Proposition 218 balloting procedure.

<sup>(1)</sup> District Zones are determined based on parcel proximity to existing District pipelines.

<sup>(2)</sup> Original County Land Use Zoning Districts were included on the rate table when the Standby Charge was established.

Sample of a New County Land Use Zoning District, Rural Living (RL) classification.

## 6. PARCEL LISTING

---

The parcel listing for the Standby Charge is provided on the following pages.

Assessor's parcel identification, for each lot or parcel subject to the Standby Charge, shall be based on the County Assessor's secured roll data for the applicable year in which this report is prepared and is incorporated herein by reference.

A listing of assessor's parcels subject to the Standby Charge in Fiscal Year 2024/25, along with the assessment amounts, is on file in the office of the County Clerk and incorporated herein by reference. Based on County Assessor's secured roll data, current assessor's parcels, including corrected and/or new assessor's parcels, will be submitted and/or resubmitted to the County Auditor/Controller. The annual assessment amount to be levied and collected for the resubmitted parcel(s) shall be determined in accordance with the method of apportionment and assessment rate approved in this report. Therefore, if a single assessor's parcel has a status change in development, other land use change, or subdivides into multiple assessor's parcels, the assessment amounts applied to each of the new assessor's parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment amount.
